Abstract (en)
[origin: WO2020078973A1] The invention relates to a plug connector having a contact carrier (2), wherein there is at least one contact chamber in the contact carrier (2), into which chamber a contact partner (3) is inserted and primary-locked there. On the one side of the contact carrier (2), an opening for the primary interlock and the increase in transmission rate is associated with each contact partner and, on the opposite side of the contact carrier (2), there is an additional, single opening, the openings having an elongated rectangular shape.
