Abstract (en)
[origin: WO2020125968A1] The invention relates to a method for controlling a power converter (2), in which a target value of a control parameter is limited by at least one limiting value. The method according to the invention is characterized in that the at least one limiting value is determined dynamically over time as a function of a power converter temperature. The invention further relates to a power converter system (1) having a control device (13), which is designed to carry out the method according to the invention.
