Abstract (en)

[origin: EP3868236A1] The invention relates to a system for controlling a sun visor for a helmet, in particular a system that is incorporated into a safety helmet for motorised vehicles, in particular motorbike or motor racing helmets, said system comprising an extraction mechanism with a control device, integrated into the mechanism, which permits said visor to be positioned at different heights in a lower stowed position in order to adjust the use position according to the preferences of the user and so that it is better suited to their physiognomy
