Abstract (en)

[origin: WO2020083942A1] The invention relates to a chemical synthesis method, the method comprising Spray Flash Evaporation, also referred to as SFE, comprising the chemical reaction of at least one first compound with at least one second compound, in conditions in which the first compound and the second compound react to form at least one third compound. The invention relates to a device for implementing this method and the compounds obtained by this method.
