Abstract (en)

[origin: WO2020085986A1] An explosive composition, its manufacture process and its use comprising an oxidiser solution, with at least one water soluble fuel or at least one water insoluble fuel, with at least one pH sensitive thickener, with at least one pH modifier, with at least one sensitising material to create hot spots, optionally with at least one hydrogen peroxide stabiliser, optionally at least one surfactant to assist with the incorporation of solid sensitising material or produce homogeneous sized gas bubbles in the final gel, with at least one high-density material to increase the density of the product so it sinks easily in water and water.
