Abstract (en)
[origin: WO2020084083A1] The invention relates to a window or door element comprising a frame (2) and an insulating glazing (1) arranged in the frame (2) in a removable manner, the insulating glazing (1) comprising at least one, preferably two, first electrical connection pads (8) and the frame (2) comprising at least one, preferably two, second electrical connection pads (28), wherein at least one, preferably two, of the first electrical connection pads (8) of the insulating glazing (1) are in electrical contact with at least one, preferably two, of the second electrical connection pads (28) of the frame (2) when the insulating glazing unit (1) is inserted into the frame (2). The invention makes it possible to change an insulating glazing of a window or a door, which is to be electrically connected, without having to change the whole assembly.
