Abstract (en)
[origin: WO2020083751A1] The attachment accessory (2E) includes one or more anchoring elements (21E) projecting at the periphery of the attachment accessory. It is suitable for being inserted completely or partially in a groove or an opening (40) of the part (4') and for being attached in the groove or opening by rotation of the attachment accessory on itself about an axis of rotation (A), such that each anchoring element (21E) penetrates into the material of at least one side wall (40b) partially defining the groove or opening (40).
