Abstract (en)

[origin: WO2020084232A1] The invention relates to a method for driving the display of information on a screen banner (100) equipping a boat gangway control post (10), the control post comprising at least one image sensor oriented towards the bow of the boat. According to the invention, the method comprises: -a step of acquiring, by means of each image sensor, an image representing the environment ahead of the boat, -a step of processing said image so as to detect each noteworthy zone of this image, and -a step of driving the screen banner so that it displays the image and, superimposed with this image, at least one graphical element distinguishing said noteworthy zone.
