Abstract (en)
Provided is a heating assembly comprising: an inner cylinder into which a flavor-generating article can be inserted; an outer cylinder disposed outside the inner cylinder; a pair of sealing members disposed between each of the ends of the inner cylinder and each of the ends of the outer cylinder so as to form a closed space having heat insulation function between the inner cylinder and the outer cylinder; and a heating member, wherein the heat conductivity of the sealing members is lower than that of the inner cylinder.
