Abstract (en)

[origin: EP3873104A1] The present application provides a sound box system, the sound box system comprising: a sound box base and a sound box peripheral that are mutually independent. The sound box peripheral is provided in the form of a cartoon character, and the sound box base and the sound box peripheral are connected in a contact or non-contact manner. The sound box base and the sound box peripheral are configured to provide personalized voice data corresponding to the cartoon character when being in a connected state.
