Abstract (en)
[origin: WO2020089054A1] The present disclosure relates to an aerosol-generating article e.g. a Heat-Not-Burn (HNB) consumable comprising an aerosol-forming substrate and a flow restrictor element downstream of the aerosol-forming substrate. There is provided, in axial flow arrangement, the aerosol-forming substrate, an upstream filter element, a spacer element and a terminal filter element. At least one of the filter elements is a hollow bore filter element. The flow restrictor element is provided upstream of the terminal filter element and downstream of the aerosol-forming substrate.
