Abstract (en)
[origin: WO2020089123A1] The present disclosure relates to an aerosol-forming article (1) comprising an aerosol-forming substrate (2) and at least one filter element (5) downstream of the substrate. The at least one filter element is a hollow bore filter element and the article has at least one unimpeded flow path (10) along the outer surface of the filter element. The present disclosure also relates to a heat-not-burn (HNB) consumable comprising an aerosol-forming substrate and at least one filter element downstream of the substrate. The consumable has at least one unimpeded flow path along the outer surface of the filter element.
