Abstract (en)

[origin: WO2020088791A1] The invention relates to a security element for making documents of value secure, comprising a carrier substrate, which is provided with a first thin-film element and a second thin-film element, wherein the first thin-film element is a colour-changing thin-film element, which gives a viewer the impression of different colours at different viewing angles, and the second thin-film element is a semitransparent thin-film element, which gives a viewer the impression of different colours when viewed with the light reflected and when viewed with the light shining through, wherein the first thin-film element and the second thin-film element are arranged on the carrier substrate in such a way that the second thin-film element takes the form of characters, a pattern or a coding and the first thin-film element represents a background.
