Abstract (en)

[origin: WO2020088875A1] The invention relates to a charging station (2) for electric vehicles, comprising at least one charging column (5) having a charging column housing (7), wherein in the charging column housing (7), at least one receptacle (2a) is arranged, which is designed to receive a charging device (3) having a charging device housing (9) that corresponds to the receptacle (2a). At least one charging technology module (50) is integrated in the charging device housing (9), wherein of the charging device housing (9) and the charging column housing (7), only the charging device housing (9) is completely sealed.
