Abstract (en)
[origin: WO2020088874A1] The invention relates to a charging unit (6) for electric vehicles, comprising a housing (29), comprising at least one base (41) and a cover (27), at least one communications module (90) arranged in the housing (29) and having at least one communications antenna (31, 31.1, 31.2, 31.3), at least one user interface module (92) arranged in the housing (29), wherein the communications module (90) and the user interface module (92) are arranged in the housing (29) in such a way that, starting from the cover (27), the user interface module (92) is arranged such that it comes first and the communications module (90) is arranged such that it follows, and wherein the at least one communications antenna (31, 31.1, 31.2, 31.3) arranged on the communications module (90) is at least partially not covered by the user interface module (92) starting from the cover (27).
