Abstract (en)

[origin: WO2020089141A1] The invention relates to a vehicle seat (1) for a motor vehicle, comprising a seat frame (4) which can be secured to a vehicle base, a seat part (2) which is supported by the seat frame (4), and a ventilating device (21) which has at least one controllable air-conveying device (9) and at least one outlet device (18) that is fluidically connected to the air-conveying device (9). A seat part element (6) which elongates the seat part (2) is mounted on the seat frame (4) in a longitudinally movable manner relative to the seat part (2), and the seat part element (6) has the ventilating device (21).
