Abstract (en)
[origin: WO2020088757A1] The invention relates to a bioenergy plant (10), in particular a biomass power plant (10), wherein the biomass power plant (10) is configured for mixing at least a portion of the scrubber condensate (48) with at least a portion of the offgas condensate (58) to produce a mixed condensate (64) and/or the bioenergy plant (10) is configured for supplying at least a portion of the scrubber condensate (48) to the offgas condenser (56) as scrubbing liquid to promote precipitation of the offgas condensate (58). The invention further relates to a process for operating a bioenergy plant (10), an offgas aftertreatment system (54) for a bioenergy plant (10), a process for offgas aftertreatment (54) of a bioenergy plant (10) and the use of a scrubber condensate (48) from a bioenergy plant (10) for offgas purification (54).
