Abstract (en)

[origin: WO2020089787A1] A door or window (1) comprising a support frame (2) having at least an upright (3) and/or a crosspiece (4); and a closing panel (5) reversibly movable with respect to said support frame (2) at least between a closing condition of the door or window (1) and an at least partial opening condition of the door or window (1). The door or window (1) comprises a magnetic induction closing catch (7), operatively interposed between a first portion (100) of the closing panel (5) and a first portion (101) of the support frame (2) to retain the panel in the closing condition of the door or window (1), and mechanical locking means (10), operatively interposed between a second portion (200) of the closing panel (5) and a second portion (201) of the support frame (2) to lock the panel in the closing condition of the door or window (1 ).
