Abstract (en)

[origin: WO2020088989A1] The invention relates to a facade element (100) having a first glass unit (1), in particular insulating glass unit, and at least one second glass unit (2), in particular insulating glass unit, arranged adjacently thereto, wherein the two glass units (1, 2) are connected to one another via their edges adjoining one another in an abutment region, preferably exclusively with the aid of an, in particular transparent, adhesive connection (3), wherein the adhesive connection (3) is preferably formed by a two-component silicone material (4). The invention further relates to a corresponding production method.
