Abstract (en)

A storage assembly (100) is for a flexible tubular component (106). The storage assembly (100) includes an axle (102). The axle (102) is configured with one or more axle stubs (116, 122). The storage assembly (100) includes a reel (104). The reel (104) is rotatably mounted around the axle (102) to allow winding of the tubular component (106) on the reel (104). The reel (104) is manufactured of a plastic material. The storage assembly (100) is characterized in that the one or more axle stubs (116, 122), at least partially enclose at least one cylindrical metal element (118) therein.
