Abstract (en)
[origin: WO2021175770A1] The aim of the invention is to improve the cleaning power of washing and cleaning agents, especially with regard to bleachable stains, while avoiding any damage to the textile treated with said washing and cleaning agents. This was essentially achieved by using 3-pyrroline- and pyrrolidine-nitroxide radical compounds which can optionally be produced in situ electrochemically from the corresponding N-oxides or hydroxylamines.
