Abstract (en)
[origin: CA3171830A1] The invention relates to a handgun, comprising a slide (1), an ejector (18) and an extractor unit (2), which comprises at least one stirrup-shaped extractor (21), a plunger (22) and a biasing element (26). For easier production and simplified assembly/disassembly, it is provided that:- the plunger (22) comprises a plunger body (221) and a plunger extension (222), that- a frame (27) is provided for mounting the biasing element (26) and at least the plunger body (221), that the slide (1) comprises a reception (19) for the frame (27), and that- the slide (1) comprises a maintenance bore (191) which, in the installed state, penetrates the slide from below in the direction of the reception (19) and is provided in the region of the plunger body (221).
