Abstract (en)  
[origin: CA3144127A1] The invention relates to an apparatus (1) for strapping packaged goods (2) with at least one strapping band (4), comprising a band guiding means (5) for guiding the strapping band (4), a conveying device (7) for extending and retracting the band guiding means (5), a guide carriage (11) which can be extended together with the band guiding means (5) by a target extension length as far as a diversion point, a length limiting band (21) which is connected to the guide carriage (11) and can be extended with the guide carriage (11), and an adjusting device (24) for adjusting the target extension length of the guide carriage (11) to the diversion point. The guide carriage (11) has a deflection unit (12) which can divert the band guiding means (5) at the diversion point. According to the invention, the adjusting device (24) is designed to determine an actual extension length of the guide carriage (11) and, according to a target extension length of the guide carriage (11), to control a fixing device (28) which stops the extension movement of the length limiting band (21).
