Abstract (en)

[origin: WO2020094719A1] The invention relates to a packaging for products (11) of the cigarette industry, comprising a carton part (22) for receiving a packaging content (29) and comprising a lid (23) for closing the carton part (22), the lid (23) and the carton part (22) bearing against one another by means of respective closing edges when the packaging (10) is closed. The invention is characterised in that the lid (23) and carton part (22) are connected temporarily to one another in the region of at least one closing edge, specifically until the packaging (10) is opened for the first time.
