Abstract (en)

[origin: WO2020095005A1] A cell culture and/or seeding device (10) comprising: - at least one culture chamber which has at least one transparent optical window (11), - at least one fluid inlet (12) and at least one fluid outlet (13) communicating with the culture chamber, - at least one three-dimensional culture support (20) placed in the culture chamber, having surfaces (21, 22) spaced out along an axis (X) of the culture support, the culture support being placed in the culture chamber in such a way that the flow circulating between the fluid inlet and the fluid outlet passes through said culture support from one surface to the other, and in such a way that one of the surfaces thereof, preferably the fluid inlet face, is at least partially located opposite the optical window (11).
