Abstract (en)

[origin: WO2020094871A1] The present invention relates to a device (100) for configuring a production machine on the basis of product data, wherein the device (100) comprises: an interface device (10) which is designed to provide product data for a product to be produced; a computer device (20) which is designed to evaluate the product data and, on the basis thereof, to generate configuration data for a machine configuration of the production machine; and a control device (30) which is designed to control the production machine on the basis of the configuration data in order to produce the product.
