Abstract (en)  
[origin: WO2020094483A1] The invention relates to a plug connector comprising a housing (8) and at least one contact (10) which is held on the housing (8) and which is designed to contact a contact (10) of another plug connector (6), wherein the housing (8) has at least one shaped element (12) for securing at least one shield plate (30, 32). The invention is characterized in that the housing (8) has at least one guide element (14, 16) which is designed to guide and position the plug connector (4) on another plug connector (6) in a form-fitting manner, said guide element (14, 16) being arranged at a distance from the shaped element (12).
