Abstract (en)

The present invention provides a bra with a wide under band hem and a manufacturing method thereof. The bra comprises cups, a center front, back wings and an under band hem; the under band hem is of a continuous strip-shaped structure; the under band hem has positioning lines; the lower edges of the cups are connected to the under band hem along the positioning lines; and the under band hem is not connected to the cups in an area where the under band hem and the cups are relatively overlapped, so that interlayers are formed between the under band hem and the cups, and the interlayers are used for accommodating part of breast fat. According to the bra with a wide under band hem and the manufacturing method thereof provided by the present invention, the bra is simple in structure, comfortable to wear, and good in supporting stability and shaping effect, and the problems of stuffiness and airtightness of the bra and the curling and eversion of the under band hem can be effectively avoided.
