Abstract (en)

The present invention relates to a method and a device (1) for fixing a plinth (21) to a built-in dishwasher (100). The device comprises a holder (2) configured for being fixed to a surface (21a) of the plinth (21) facing, in use conditions of the device (1), the front portion (100a) of the dishwasher (100). The device (1) comprises also a positioner (3) configured for being coupled to the dishwasher (100) and connectable to the holder (2). The positioner (3) extends along a main development direction (MD) and comprises a plurality of modular elements (4) connected or connectable to each other. The connection between the modular elements (4) allows the adjustment of a length (L) of the positioner (3) so as to allow, in use conditions, the device (1) to cover a distance (D) defined between the plinth (21) and the dishwasher (100).
