Abstract (en)
[origin: EP3879057A1] The present invention relates to a guide rail (2) comprising upright guide ribs (5, 6) for guiding sliding door leaves (3, 4) in a sliding door assembly (1) and a channel (11) which is delimited by the guide ribs (5, 6) for discharging precipitation landing on the sliding door leaves (4), wherein the guide rail (2) comprises a zone (12) at one end which is free from the guide ribs (5, 6) at the top and in which a collector (13) is provided in which the channel (11) ends, and wherein the guide rail (2) is provided with a hollow chamber (15), a passage opening (16), which connects the collector (13) to the hollow chamber (15), and an outlet opening (17), which connects the hollow chamber (15) to an outside environment (14) for draining off the precipitation.
