Abstract (en)

[origin: WO2021180583A1] The invention relates to a microphone circuit (1) that is characterised, for the purpose of damping resonance and linearising the proximity effect, in such a way that an impedance element (5) can be connected in parallel to the microphone. The impedance of this element is preferably between 20 and 1000 ohms.

Abstract (de)

Mikrofonschaltung, die zwecks Dämpfung der Resonanz und Linearisierung des Proximity-Effekts dadurch gekennzeichnet ist, dass ein Impedanzelement (3) parallel zum Mikrofon schaltbar ist. Die Impedanz dieses Elements liegt bevorzugt zwischen 20 und 1000 Ohm.
