Abstract (en)

[origin: WO2020099105A1] The invention relates to an application member (3, 3') for applying cosmetic product by stamping on the skin, in particular for applying eyeliner to the eyelids, defining a longitudinal axis (X), a transverse axis (Y) perpendicular to the longitudinal axis and an antero-posterior axis (Z) perpendicular to the longitudinal axis (X) and to the transverse axis (Y), and having a front application surface (30, 30') suitable for being loaded with cosmetic product by placing the front application surface (30, 30') in contact with the cosmetic product and for being at least partially placed in contact with the skin to deposit by stamping thereon a line of cosmetic product whose shape and contour correspond substantially to the shape and contour of the part of the front application surface (30, 30') placed in contact with the skin, wherein the front application surface (30, 30') is outwardly convex when the application member is observed in the plane defined by the longitudinal axis (X) and the transverse axis (Y).
