Abstract (en)

[origin: WO2020097648A1] Arrangement (1) for guiding at least one movable furniture part (2), in particular at least one furniture door or at least one drawer, relative to a fixed furniture part (3), comprising - at least one guide rail (4), which is provided for being mounted on the fixed furniture part (3), and - at least one guide device (5), which can be coupled in particular to the at least one movable furniture part (2) and has at least one, preferably substantially cylindrical, load-transmitting rolling body (6), wherein the at least one guide rail (4) has at least one guide track (7), on which the at least one load-transmitting rolling body (6) is mounted in a movable manner, the at least one guide track (7) has at least one parking position (8, 9) for the at least one load-transmitting rolling body (6), and the at least one parking position (8, 9) corresponds to an end position of the at least one movable furniture part (2) relative to the fixed furniture part (3), wherein the at least one load-transmitting rolling body (6) and the at least one guide track (7) are designed, at least in the region of the at least one parking position (8, 9), such that the at least one guide track (7) can be deformed in this region, a depression (10) being formed in the process, and the at least one load-transmitting rolling body (6) is substantially dimensionally stable.
