Abstract (en)

[origin: WO2020102046A1] Provided is a container for storing, preserving, identifying, tracking and transporting a government regulated product or federally controlled substance having a child resistant and senior friendly lid, and a process for identifying and tracking a government regulated product or federally controlled substances within the re-sealable containers. The government regulated product or federally controlled substance containers include a two-piece child resistant and senior friendly lid and a 2-factor authentication identification tag, as well as a microchip for identifying the container government regulated product or controlled substance contents and tracking the container. Government regulated product or controlled substance contents within the containers are optimized for long term storage by removal of the oxygen therein, and the containers and government regulated product or controlled substance contents can be readily identified, detected, tracked and traced after being filled with a government regulated product or federally controlled substance.
