Abstract (en)

[origin: WO2020099619A1] A fragrance dispensing device is provided. The fragrance dispensing device comprises a casing, an axially rotatable carrousel, a carrousel actuator for rotating the carrousel so as to place a fragrance cartridge in a dispensing position and a dosing actuator for causing the release of a predefined amount of liquid from the fragrance cartridge at the dispensing position. The axially rotatable carrousel is mounted on a carrousel support inside the casing and comprises a plurality of seats for arranging a plurality of fragrance cartridges. The carrousel support is movable between an operating position inside the casing and an access position substantially outside the casing.
