Abstract (en)
[origin: WO2020099532A1] The invention relates to a belt drive (1) with two or more belt pulleys (8, 9), a continuous drive belt (3), and a tensioning device (2) for the drive belt (3). The tensioning device (2) has two or more tensioning units (12, 13), wherein each belt pulley (8, 9) is paired with a tensioning unit (12, 13). The tensioning units (12, 13) are movably arranged, and the distance from the tensioning units to the paired belt pulleys (8, 9) can be adjusted in order to tension the drive belt (3).
