Abstract (en)

[origin: WO2020099194A1] The invention relates to a device and a method for producing packaging wrapped with a web material, comprising a packaging transport device which transports the packaging through a folding and/or wrapping device, wherein the folding and/or wrapping device comprises a wrapping element, which is guided about the packaging transport device, for receiving the web material and for wrapping the packaging with the film, and a cutting station is provided which is designed to cut the web material and comprises a transport device for transporting and supplying web blanks to the packaging transport device. An adhesive application device is to be arranged in the region of the transport device, said adhesive application device being designed to apply adhesive to the inner face of the web blank and in the region of the longitudinal lateral edges of the web blank in order to adhere the longitudinal lateral edges of the web blank to the end faces of the packaging prior to shrinking the web blank.
