Abstract (en)  
[origin: WO2020097645A1] Furniture hinge (8), comprising: - a first fitting part (12) for fastening to a first furniture part (3a), - a second fitting part (13) for fastening to a second furniture part (3b), - at least one hinge pin (14) via which the first fitting part (12) and the second fitting part (13) are connected together in an articulated manner, - wherein the fitting parts (12, 13) are movable relative to one another between a first position, in which the furniture parts (3a, 3b) connected in a mounted state to the fitting parts (12, 13) are oriented in a substantially coplanar manner with respect to one another, and a second position, in which the furniture parts (3a, 3b) connected in the mounted state to the fitting parts (12, 13) are oriented substantially parallel to one another, - a covering (11) which is mounted so as to be movable about the hinge pin (14) and by means of which a gap formed between the first fitting part (12) and the second fitting part (13) can be covered at least in certain portions, wherein a movement of the covering (11) can be coupled with a movement of the furniture hinge (8), wherein the first fitting part (12) and/or the second fitting part (13) has or have at least one stop (20a, 20b) and the covering (11) has at least one counter-stop (21a, 21b), wherein the at least one stop (20a, 20b) of the first fitting part (12) and/or of the second fitting part (13) butts against at least one counter-stop (21a, 21b) of the covering during a relative movement of the fitting parts (12, 13) with respect to one another, and the covering (11) is movable at least partially about the hinge pin (14) as a result of the at least one stop (20a, 20b) bearing against the at least one counter-stop (21a, 21b).
