Abstract (en)
[origin: WO2020097643A1] Arrangement (1) for guiding at least one folding/sliding door (2) having at least two door leaves (4, 5) which are connected to one another in an articulated manner, in particular via at least one door hinge (3), and can be moved between a parallel position, in which the at least two door leaves (4, 5) are oriented substantially parallel to one another, and a coplanar position, in which the at least two door leaves (4, 5) are oriented in a substantially coplanar manner, wherein the arrangement (1) comprises at least one guide rail (7), which is provided for fastening on a fixed furniture part (6), and at least one guide device (8, 34), which can be connected to the at least one folding/sliding door (2) and is mounted such that it can be moved on the at least one guide rail (7), and wherein the arrangement (1) has at least one vertical carrier (27), on which the at least one folding/sliding door (2) can be mounted in a pivotable manner, preferably at least one carrier hinge (28) being provided for this purpose, wherein the at least one guide rail (7) and/or the at least one guide device (8, 34) comprise/comprises at least one force store (9, 10), by means of which the at least one folding/sliding door (2), when in use, can be subjected to a force (12) directed counter to the weight-induced force (11).
