Abstract (en)

[origin: WO2020099746A1] Headlamp unit comprising a frame (10), a headlamp module, and a protective shield (30) which is attached to the frame (10) by attachment means and is capable of concealing a portion of the headlamp module, the attachment means between the protective shield (30) and the frame (10) comprising at least one shaft (34) supported by one of these elements and having a hole into which a screw (60) is screwed having previously passed through a corresponding opening in a wall (12) supported by the other element, the headlamp unit comprising retaining means (16) provided on the protective shield (30) or on the frame (10) and capable of cooperating, when the protective shield (30) is put in place, with additional means (35) provided on the other one of these elements so as to prevent the shaft (34) from moving away from the wall (12) while screwing in the screw (60).
