Abstract (en)
Provided is a tobacco-containing segment that can suppress staining on a wrapper thereof and uniformly deliver a volatile component contained therein throughout inhalation. The tobacco-containing segment for a heat-not-burn smoking article, includes a tobacco filler containing tobacco and an aerosol former; and a wrapper that covers the tobacco filler, where the wrapper includes a paper and a polymer layer provided on an inner surface of the paper; and the polymer layer contains a polymer as well as a volatile flavor component or an aerosol former.
