Abstract (en)
A hairbrush (10) includes: a head portion (12) having a brush surface (13) on which rod-like protrusions are provided in a standing manner; and a handle (12c). The brush surface (13) has a longitudinal direction (X) and a width direction (Y) orthogonal to the longitudinal direction. The hairbrush (10) includes a first protrusion region (A) provided in a central portion in the width direction (Y), the first protrusion region including first protrusions (15 and 17) spaced apart from one another, each first protrusion being provided singly and independently. One or more second protrusion rows (J3) are provided on each of both sides sandwiching the first protrusion region (A) in the width direction (Y), each second protrusion row including a plurality of second protrusions (16) formed along the longitudinal direction (X), each second protrusion (16) having a greater cross-sectional area than the first protrusion (15 and 17) and having a shorter length than the first protrusion.
