Abstract (en)  
The present invention relates to a bartending workstation (410), comprising a bearing structure (411), above which a work surface (412) is defined, at least one opening (413) being defined at the work surface (412) inside which opening there is at least one ice-holder tray (414); at least one bottle-holder tray (415) adjacent to the work surface (412) being defined, which is supported by the same bearing structure (411). Said at least one bearing structure (411) is constituted by at least one single piece (420A, 420B) of a sheet or of a plate of a folded self-supporting flexible material.
