Abstract (en)
[origin: WO2020104001A1] The invention relates to an evacuation system, particularly for children, in which a safety line for connecting a group of people is provided, and said safety line comprises a plurality of interconnected connection lines and retainer loops, wherein the connection lines (2) and the retainer loops (1, 2, 4, 5) are interconnected by swivels (3). This allows rapid and safe evacuation of children even under the difficult conditions of an emergency.
