Abstract (en)

[origin: WO2021032363A1] The invention relates to a supply system (1a) comprising a main body (2) and at least one supply port (3 to 8) which is inserted in the main body (2) and provides a supply medium. The main body (2) extends along a longitudinal axis and comprises multiple outer wall portions (9 to 12) and at least one connection portion (13 to 16). The or each connection portion (13 to 16) mechanically interconnects two adjacent outer wall portions (9 to 12). At least one connection portion (13 to 16) has at least one undercut (17 to 24). The or each undercut (17 to 24) has the form of a channel or groove or chase or profile rail and extends along the longitudinal axis of the main body (2).
