Abstract (en)
[origin: WO2020106246A2] The invention is a hood hinge assembly (1), which enables the opening and closing motion of the glass, metal or plastic cover (13) introduced in front of the filter (12), which is located at the motor housing (3) of the hood (2), comprising a glass adhesive element (4) to which the cover (13) is mounted, a hinge element (7) introduced on the glass adhesive element (4) in order to allow the opening and closing motion of the cover (13), a hinge element counterpart (8) which provides a moving structure by providing a bearing for the hinge element (7).
