Abstract (en)
[origin: WO2020106899A1] A rail mountable device may be provided that is configured to be secured firmly to a rail. In one example, the rail mountable device may include a rail clamp that includes a screw, a screw receptacle, a first ramp member coupled to the screw, and a second ramp member coupled to the screw receptacle and configured to move relative to the screw receptacle. Additionally, the rail mountable device may include a removeable battery pack with a battery indicator. Furthermore, the rail mountable device may include a plurality of switches disposed on either side of the rail mountable device. The switches may be coupled to a bracket and a mode of the rail mountable device may be operated through manipulation of the switches. Additional embodiments and related methods are provided.
