Abstract (en)

A dispensing device (1) for a fluid substance, comprising a dispensing cap (10) coupled with a pressurized can (3), the dispensing cap (10) comprising a base element (2) equipped with constraining means (11, 11A, 12) configured for coupling to the pressurized can (3), the base element (2) being secured to a button (4) configured to be fitted onto a stem (6A) of a valve (6) of the pressurized can (3), so that pressing the button (4) results in the dispensing of a product contained inside the can (3) by means of a nozzle (8); the base element (2) comprises a yielding part (9) configured to facilitate removal of the dispenser cap (1) from the pressurized can (3).
