Abstract (en)
[origin: CA3109019A1] A sanitary installation comprising a sanitary object in the form of a WC (3) and a flushing apparatus (5) which can be actuated by means of a control device (10) with at least one assigned sensor device (4) for automatic flushing as a function of at least one sensor information item, wherein the control device (10) is configured to determine the position of a user (1) or of a body part of the user (1) relative to the WC (3) over time on the basis of the sensor information and to actuate the flushing process with a variable quantity of flushing water as a function of the position progression plotted over time.
