Abstract (en)  
The invention relates to a method for packaging an underroof collar for use in water-proofing a joint between a roof structure and a window frame. Said method comprises the steps of: Folding along a first folding line extending substantially in parallel to the top and bottom collar members; folding along a second folding line extending substantially in parallel to the top and bottom collar members; folding along a third and a fourth folding line extending substantially in parallel to the side collar members; and fixating the underroof collar in a folded state. It further relates to a packed underroof collar, to a roof window with a packed underroof collar attached to a window frame, and to a method for installing an underroof collar including unfolding steps.
